NATIONAL RESEARCH COUNCIL
OF THE UNITED STATES OF AMERICA

SPACE SCIENCE BOARD

November 18, 1959

Dr. Joshua Lederberg
Department of Genetics
School of Medicine
Stanford University
Stanford, California

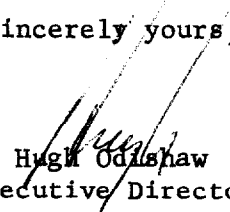

Dear Lederberg:

As you know, I am most appreciative of your recent letter, touching upon the man-in-space situation. You will be pleased to know that a very sensible position, in accordance with your views, was presented to the PSAC by Berkner.

Moreover, this position is reflected in the written paper submitted to PSAC, copies of which will be in the hands of Board members in a day or two.

With kindest personal regards,

Sincerely yours,

Hugh Odishaw
Executive Director
